Unscrew the charging port cover, connect to a computer, and copy photos and video data files.

Notifcation

- • Because the uncooled infrared telescope uses a very sensitive thermal sensor, it is not allowed to directly aim the lens at a strong radiation source (such as the sun, direct laser beam or reflection, etc.) under any circumstances (turn on or off), otherwise it will Permanent damage to the refrigerated infrared telescope!
- • Please check the power when the instrument is used for the first time, charge it before use if necessary, and place the instrument at room temperature during USB charging.
- • Do not open the case or modify it without authorization. Maintenance can only be carried out by authorized personnel of our company.
